

SOFISTICATO

Koen Van Guijze

SERAX

The Sofisticato collection owes its raw, timeless beauty to the minimalist design and the frequent use of **bluesteel**. Or as Koen Van Guijze describes it: "A straightforward material, fashioned by human hands, not spat out by a machine." Every single part is manually milled, turned, sawn, drilled, and welded by craftsmen. Then the steel is heated and carefully polished by hand. This procedure makes the steel rust-resistant, in addition to giving it its characteristic blue glow. All luminaires in the collection can be perfectly combined, and the brass Sofisticato Wall Light 170 and Wall Light 340 provide an original, contrasting touch.

KOEN VAN GUIJZE

In his teens, Antwerp designer Koen Van Guijze (1967) was already greatly fascinated by lighting. As a school DJ he loved playing with the colours and intensity of the lights, syncing them with the beat of the music. After obtaining his degree in marketing, he worked in sales for a number of years, where he soon ended up in the lighting industry. In 2002, he launched Accessori Architectural Lighting in Antwerp, where he sells lighting objects in addition to devising and elaborating custom-made concepts. Inspired by interior architect Vittorio Simoni, he studied interior architecture for a year. In doing so, he laid the foundations of what would become a course of trial and error. He prefers 'authentic' materials such as steel, brass, concrete, cork, ceramics, sand, and paper. While his style shows traces of brutalism, the sophisticated details express a certain contradiction. Or as he himself says: "There is poetry in everything I design."
